Solar Twin Kobo – TWS earphones with base for standard and solar charging

SKU: TEEARTWSSUNBTK

Solar charging gives you a back-up power source that lets you deal with minor day-to-day emergencies with headphones that are always ready to use

TWS EARPHONES: STANDARD CHARGING AND SOLAR CHARGING TO HELP YOU FACE ANY SITUATION

The **Kobo Solar Twin TWS earbuds** have a base that lets you charge them in two different ways: **Standard charging**, by simply inserting your earphones into the charger case, and **solar charging**, as a back up in the case both the base and the earphones are not charged.

STANDARD CHARGING OF BASE: EARPHONES CHARGE WHEN THE CASE IS CHARGED

Kobo Solar Twin Earbuds power up when connected to the **300 mAh charging base**. Thanks to this standard charging, your earphones will be fully charged in **around 2 hours**.
When the battery is flat, the case can be connected to an energy source thanks to the **USB-C cable** included in the packaging.

SOLAR CHARGING OF BASE: AN IDEAL SOLUTION IN CASE OF EMERGENCY

When the base and earphones are flat and an energy source is not available, you can use the **solar charging** feature. This back-up mode lets you use your headphones in emergency situations, making it a perfect solution if you are **travelling frequently** or always on the move.
Just place the base in the sun or near a light source with the earphones correctly inserted and **they will be fully charged in around 6 hours** or ready for use at all times.

HOW TO USE THE WIRELESS EARPHONES

The Kobo Solar Twin earphones are True Wireless Stereo: they turn off when inserted into the charging base and turn on when you remove them. **They associate with each other automatically** and are compatible with all devices, including iPhones, Android smartphones, tablets and PCs. The operation range from the audio source is **10 meters**, giving you a lot of freedom of movement while enjoying your earphones.
The **integrated touch controls** let you manage your music and calls with ease. You can also activate your phone's **voice assistant** using your earphones.

KEY FEATURES:

- True Wireless Stereo
